

## WA Exams Practice Paper B, 2015

### Question/Answer Booklet

# MATHEMATICS METHODS UNITS 1 AND 2

## Section One: Calculator-free

If required by your examination administrator, please  
place your student identification label in this box

Student Number: In figures

--	--	--	--	--	--	--	--

In words

---

Your name

---

### Time allowed for this section

Reading time before commencing work: five minutes

Working time for section: fifty minutes

### Materials required/recommended for this section

#### *To be provided by the supervisor*

This Question/Answer Booklet

Formula Sheet

#### *To be provided by the candidate*

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: nil

### Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

## Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	7	7	50	52	35
Section Two: Calculator-assumed	13	13	100	98	65
Total				150	100

## Instructions to candidates

1. The rules for the conduct of examinations are detailed in the school handbook. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer Booklet.
3. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
4. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
  - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
  - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.
5. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you **do not use pencil**, except in diagrams.
7. The Formula Sheet is **not** to be handed in with your Question/Answer Booklet.

**Section One: Calculator-free****(52 Marks)**

This section has **seven (7)** questions. Answer **all** questions. Write your answers in the spaces provided.

Working time for this section is 50 minutes.

---

**Question 1****(8 marks)**

A quadratic function is given by  $f(x) = (x - 2)^2 - 9$ .

- (a) The function can also be written in the form  $f(x) = x^2 + bx + c$ . Determine the values of  $b$  and  $c$ . (2 marks)
- (b) Solve the equation  $f(x) = 0$ . (2 marks)
- (c) For the graph of  $y = f(x)$ , state:
- (i) the coordinates of the turning point. (1 mark)
  - (ii) the equation of the line of symmetry. (1 mark)
  - (iii) the coordinates of all axes intercepts. (2 marks)

**Question 2****(7 marks)**

- (a) Determine the coordinates of the midpoint of A(-12, 3) and B(8, -9). (1 mark)
- (b) Are the straight lines given by  $3x + 4y = 12$  and  $y = 0.75x + 1.25$  parallel, perpendicular or neither? Justify your answer. (2 marks)
- (c) Determine the equation of the straight line perpendicular to the line  $y = 8 - \frac{1}{3}x$  and passing through the point (2, 1). (2 marks)
- (d) Solve  $2(3x - 2) = \frac{2x + 11}{2}$ . (2 marks)

**Question 3****(7 marks)**

(a) Evaluate  $0.00007^2$ , writing your answer in scientific notation. (1 mark)

(b) Determine the value of  $n$  if  $\frac{1}{\sqrt[4]{x^3}} = x^n$ . (2 marks)

(c) Solve

(i)  $8^{2x} = 4\sqrt{2}$ . (2 marks)

(ii)  $\sqrt[3]{(4x-1)} + 2 = 0$  (2 marks)

## Question 4

(8 marks)

- (a) Sketch the graph of
- $y = 0.5(x - 2)^3 - 1$
- .

(3 marks)

- (b) Expand
- $(3x - 1)(3x + 1)(x + 3)$
- .

(2 marks)

- (c) Solve
- $x^3 + 6x^2 + 5x - 12 = 0$
- .

(3 marks)

**Question 5**

**(7 marks)**

The graph of  $y = f(x)$  and a chord of the graph from  $(2.5, 7.5)$  to  $(5.5, 19.5)$  is shown below.

- (a) Use the ratio  $\frac{f(x+h) - f(x)}{h}$  to determine the gradient of the chord. Clearly state the values of  $x$  and  $h$  that you use. (2 marks)
- (b) As the value of  $h$  used in (a) decreases towards zero and the value of  $x$  remains unchanged, will  $\frac{f(x+h) - f(x)}{h}$  increase, decrease or stay the same? Explain your answer. (2 marks)
- (c) Clearly describe what feature of the graph of  $y = f(x)$  will be found by evaluating  $\lim_{h \rightarrow 0} \left( \frac{f(x+h) - f(x)}{h} \right)$  when  $x = 4$ . (2 marks)
- (d) On the axes above, draw the tangent to the graph of  $y = f(x)$  at the point  $(2.5, 7.5)$ . (1 mark)

**Question 6****(9 marks)**

(a) Differentiate the following with respect to  $t$ :

(i)  $x = 1 + t - t^2$ . (1 mark)

(ii)  $v = \frac{t^2}{6} + \frac{4t^3}{9}$ . (1 mark)

(b) State whether the graph of  $y = x^3 - 2x^2 - 3x - 2$  is increasing, decreasing or stationary at the point  $(-1, 1)$ . Justify your answer. (2 marks)

(c) The tangent to the curve  $y = f(x)$  at the point A is  $13x + 3y + 14 = 0$ .

If  $f'(x) = \frac{x^3}{2} - \frac{1}{3}$  find

(i) the coordinates of point A. (3 marks)

(ii)  $f(x)$ .

(2 marks)

**Question 7****(6 marks)**

- (a) Determine the coefficient of the  $x^3$  term in the expansion of  $(3 - 2x)^5$ . (2 marks)

- (b) Solve  $\sin 2x = \frac{1}{2}$  for  $0 \leq x \leq 90$ . (2 marks)

- (c) Simplify  $\cos\left(\frac{\pi}{7}\right)\cos\left(\frac{\pi}{5}\right) + \sin\left(\frac{\pi}{7}\right)\sin\left(\frac{\pi}{5}\right)$ . (2 marks)

**Additional working space**
