Trial Examination 2023

VCE Mathematical Methods Units 3&4

Written Examination 1

Question and Answer Booklet

Reading time: 15 minutes
Writing time: 1 hour

Student's Name: _____

Teacher's Name: _____

Structure of booklet

Number of questions	Number of questions to be answered	Number of marks
9	9	40

Students are permitted to bring into the examination room: pens, pencils, highlighters, erasers, sharpeners and rulers.

Students are NOT permitted to bring into the examination room: any technology (calculators or software), notes of any kind, blank sheets of paper and/or correction fluid/tape.

Materials supplied

Question and answer booklet of 12 pages

Formula sheet

Working space is provided throughout the booklet.

Instructions

Write your **name** and your **teacher's name** in the space provided above on this page.

Unless otherwise indicated, the diagrams in this booklet are **not** drawn to scale.

All written responses must be in English.

At the end of the examination

You may keep the formula sheet.

Students are NOT permitted to bring mobile phones and/or any other unauthorised electronic devices into the examination room.

Instructions

Answer **all** questions in the spaces provided.

In all questions where a numerical answer is required, an exact value must be given, unless otherwise specified.

In questions where more than one mark is available, appropriate working **must** be shown.

Unless otherwise indicated, the diagrams in this booklet are **not** drawn to scale.

Question 1 (4 marks)

Let $f:\left(\dfrac{1}{2},\infty\right)\rightarrow R, f(x)=\dfrac{1}{4x-2}.$

a. Find $f'(x)$. 1 mark

b. **i.** Find an antiderivative of $f(x)$. 1 mark

ii. Express $\displaystyle\int_{1}^{5} f(x)\,dx$ in the form $\log_e\left(\sqrt{a}\right)$, where a is an integer. 2 marks

Question 2 (2 marks)

The derivative of the function $f(x)$ has the rule $f'(x) = 3\sin(2x)$.

Given that $f\left(\dfrac{\pi}{3}\right) = 1$, find $f(x)$.

Question 3 (4 marks)

Let $f: (-2, 1] \to R, f(x) = x^3 + 3x^2$.

a. Find the coordinates of the stationary point. 2 marks

_____

_____

_____

_____

b. On the axes below, sketch the graph of $y = f(x)$. Label the endpoints and stationary point with their coordinates. 2 marks

Question 4 (3 marks)

For events A and B, $\Pr(A \cap B') = 0.2$ and $\Pr(A' \cap B) = 0.1$.

Let $\Pr(A \cap B) = k^2$ and $\Pr(A') = 1.6k$.

a. Find an expression for $\Pr(A' \cap B')$ in terms of k.   1 mark

_____

_____

_____

b. Find the value of k.   2 marks

_____

_____

_____

Question 5 (3 marks)

Solve $4\cos^2(3x) - 1 = 0$ for $x \in \left[-\dfrac{\pi}{6}, \dfrac{\pi}{6} \right]$.

_____

_____

_____

_____

_____

_____

_____

_____

_____

Question 6 (2 marks)

A transformation maps the graph of $y = f(x)$ to $y = af(bx + c) + d$, where a, b, c and d are positive real numbers. The following algorithm will be used to map any point (x, y) on the graph of $y = f(x)$ to the graph of $y = af(bx + c) + d$.

```
input x, y              # Line 1
        x _ new = _____ # Line 2
        y _ new = _____ # Line 3
        print x _ new   # Line 4
        print y _ new   # Line 5
```

Complete lines 2 and 3 of the algorithm.

_____

_____

_____

_____

Question 7 (4 marks)

The possible outcomes when a die is rolled are 1, 2, 3, 4, 5 or 6. Each outcome is equally likely.

A die is rolled three times, and the resulting number is recorded each time.

a. Find the probability that the resulting number is the same each time. 1 mark

_____

_____

_____

_____

b. Find the probability that the resulting number is the same exactly two times. 1 mark

_____

_____

_____

_____

c. What is the probability that the resulting number is greater than 3 each time, given that
it is the same exactly two times? 2 marks

_____

_____

_____
_____

_____

_____

Question 8 (12 marks)

Let $f(x) = \log_e(x-2)$.

a. State the domain of f. 1 mark

_____

_____

b. On the axes below, sketch the graph of $y = f(x)$. Label the axial intercept with its coordinates and the asymptote with its equation. 2 marks

Question 8 (12 marks)

Let $f(x) = \log_e(x-2)$.

c. Using the trapezium rule with interval widths of 1, approximate the area bounded by the curve $y = f(x)$ and the x-axis from $x = 3$ to $x = 6$. Give your answer in the form $\log_e(a)$, where a is an integer. 3 marks

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

d. Let $g: (a, \infty) \to R$, $g(x) = x^2 + 4x + 2$ and $h(x) = (f \circ g)(x)$.

Find the smallest value of a such that $h(x)$ exists. 3 marks

_____

_____

_____

_____

_____

_____

_____

_____

e. State the rule for $h(x)$. 1 mark

_____

_____

f. State the domain and range of $h(x)$. 2 marks

_____

_____

_____

_____

_____

_____

Question 9 (6 marks)

The tangent to the graph of $f(x) = 4x - x^2$ at the point $A\left(a, f(a)\right)$ is shown below.
a. Show that the equation of the tangent is $y = (4 - 2a)x + a^2$. 2 marks

_____

_____

_____

_____

_____

_____

_____

_____

b. Let $S(a)$ be the area bounded by the graph of $y = f(x)$, the line $x = 2$ and the tangent to $f(x)$ at $x = a$, where $0 \leq a \leq 2$.

Find the rule for $S(a)$.   3 marks

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

c. Find the value(s) of a such that $S(a)$ is a **maximum**.   1 mark
